

A MEATY SUBJECT.

Investigating Meat Contractors for the Army.

ANSWERS OF CHICAGO FIRMS

To Inquiries Sent out by Commissary General Egan—Methods Employed in Preparing Beef—Packers Deny that they Used Chemicals to Preserve the Meat—Categorical Replies to Leading Questions.

WASHINGTON, Jan. 3.—Commissary General Egan has been steadily prosecuting the inquiry into methods followed by the big meat packing houses of putting up the meats supplied to the army during the war. Last week he made public a formal statement from the Armour company and to-day he gave out for publication the following letters addressed to Lieutenant Colonel O. M. Smith, purchasing commissary at Chicago, which came from all save one of the firms which supplied the army meat, either refrigerated or canned.

Swift & Co., Chicago, Dec. 23.—Replying to your letter of the 27th inst. we wish to state that we do not put up tinned beef; therefore are not able to answer your interrogations with regard to tinned beef.

We are slaughterers and shippers of refrigerated beef and in all of our experience have never used any chemicals whatever with refrigerated beef.

We have made shipments of refrigerated beef to Santiago, Cuba, and Porto Rico, and have supplied the United States army during the month of December at the following places: Anniston, Ala.; Huntsville, Ala.; Knoxville, Tenn.; Savannah, Ga.; Augusta, Ga.; Greenville, S. C.; Somerville, S. C.; Columbia, S. C.

Beef shipped to Santiago, Cuba, and Porto Rico, and to various United States camps has been handled in exactly the same way as that used to supply our various branch houses at different cities and towns in the United States and England, with which any one can become familiar by visiting our branch houses and slaughtering plants.

We are, respectfully yours,

SWIFT & CO.

By G. F. Swift, President.

Libby, McNeill & Libby, Incorporated, Chicago, Dec. 28.—In reply to your letter of the 27th inst. in regard to roast beef, we first commenced packing it twenty-five years ago. It is sold by all wholesale grocers and retailers and used by the mass of people—and especially in mining camps. Large quantities have been consumed by the Alaska trade in the last two years; also in South Africa in the mining regions. We also ship large quantities of it to our foreign trade and especially Scotland, and large quantities have been used by other governments and especially the French army.

In cooking the beef before putting into cans there is naturally more or less juice that comes from the meat the same as there is when cooking it at your home which is sometimes saved and used in making soups. The beef is not cooked for the extract.

In regard to the cooking of roast beef we consider it cooked as much as corn beef to make it tender, the same as the corned beef, but it is done under a higher degree of heat, and consequently does not take as long to cook it.

Answering your question in regard to foreign ingredients and scraps being used in putting up this meat, will say we use nothing but good, wholesome, sound, government inspected beef and no scraps of any description are used. The fat in our can is part of and belongs to the beef which is packed in the can. There is none poured in. We do not handle refrigerated beef.

Respectfully yours,

LIBBY, McNEILL & LIBBY,

W. F. Burrows, Secretary.

Chicago, Dec. 29.—Your favor of the 27th inst., requesting information according to extract of a letter received at your office has come to hand and we herewith beg to submit to you all the information at our command. We repeat the questions for convenience, putting the reply after each question.

Q.—State the extent of the tinned roast beef industry.

A.—Our business in this article is very large, extending all over this country and throughout England and to the continent of Europe.

Q.—How long has this article been in use, where used and by whom?

A.—We have manufactured and sold the article in question at least eighteen years, or thereabouts, selling it principally to the wholesale grocery houses and provision dealers; and tinned roast beef is and has been used by all classes of people. We have for years supplied this article, directly or indirectly, to the British government for use of the navy; in the latter case before, during and after the Spanish war and made our sales upon samples inspected and approved by the proper board of inspectors.

Q.—Is it largely used in this country, if so, by whom sold and the class of people who generally purchase it?

A.—As stated in answer to previous questions we have sold it very exten-

sively in this country for years, principally to wholesale grocery and provision houses throughout this country. We understand these people have in turn supplied the retail grocers, ship chandlers, exporters and country merchants so that it is and has been used and consumed by all classes of people. In addition, as we have stated, large quantities have been used by the American army.

Q.—If it has been sold to foreign countries, about how much, and who uses it?

A.—Our principal sales of this product have been to England, there we have shipped many thousands of cases each year for a long period of years. Also to France. Our principal customers have been the governments and wholesale grocery and provision houses, and we are informed that this product is sold by the latter to retailers, who again distribute it to all classes of people, especially those who need the food for long sea voyages, and in other cases where preserved meats are required.

Q.—Do all packers make soup from the water after cooking the tinned roast beef, or not?

A.—We make no soup from the water after cooking the tinned roast beef.

Q.—Whether or not the tinned roast beef is cooked as much as the tinned corn beef?

A.—Yes. It is even cooked in a higher temperature.

Q.—Are any chemicals used in the processing of the tinned roast beef?

A.—No, none whatever.

Q.—Have any of the packers ever used, and if so why, any scraps in putting up this meat, and where did they get the scraps—why are there scraps if scraps are used?

A.—We have never used and do not use scraps in putting up this meat. We cut up certain cuts of meat, parts of the carcasses, and use such parts in the making of tinned roast beef.

Q.—Whether in the course of processing or packing this tinned roast beef, tallow is afterwards poured in, or whether it is the fat that properly belongs to and is part of the meat?

A.—We never pour in tallow of any kind, at any time. We cut up with the meat when it is raw the fat that properly belongs to, and is part of the meat.

Q.—Do any of the packers at any time use any chemicals whatsoever with refrigerated beef, if so, why?

A.—We don't, and have never used any chemicals whatsoever with refrigerated beef, and see no reason why any should be used.

Q.—Has any packer who has furnished refrigerated beef to the subsistence department ever, or anywhere, or to any extent, used any chemicals of any kind whatever in the treatment of refrigerated beef?

A.—We certainly have not at any time, or under any circumstances whatsoever, used any chemicals, and do not believe any other packers have.

Q.—Whether any chemicals whatsoever touch the meat itself?

A.—No, we have never used chemicals under any circumstances.

Q.—Has the meat ever been treated by any chemical process of any kind whatever?

A.—No, never.

We trust that our replies as above are clear and exhaustive, enough for the purpose intended, and will be glad to furnish you any further information in our power.

Yours truly,

NELSON, MORRIS & CO.

Per Wolfner.

ENGLAND'S NEW LEADER.

Sir Henry Campbell-Bannerman will fill the gap made by the resignation of Sir William V. Harcourt.

Upon the best of authority it can be announced that the new leader of the Liberal party in England in the house of commons will be Sir Henry Campbell-Bannerman, the celebrated Scotch

statesman. Sir Henry will straighten out the entanglements caused by the retirement of Sir William Vernon Harcourt, and by his shrewd and daring diplomacy win back for the Liberalists whatever prestige may have been lost through the recent discussion.

Possessing enormous wealth and being of undoubted social standing, Sir Henry is especially qualified for the new honors which have been or are about to be bestowed upon him. His home, at No. 6 Grosvenor Place, London, is a masterpiece in modern architecture, and its inside furnishings are said to be among the most elaborate in England. In addition to this is a castle in Scotland equally magnificent.

Full of Years.

Special Correspondence of Intelligence.

SARASVILLE, O., Jan. 2.—Mrs. Abigail Morgan, who died last month, was the oldest person in southeastern Ohio, being over ninety-eight years of age.

Mrs. Morgan was born at Ellicott, Maryland, November 25, 1800. In 1825 she came to Ohio, walking most of the way behind an immigrant wagon. She had five children, four of them along with her husband being dead. She leaves to mourn her decease, one daughter, Mrs. J. M. Kirkbride, of Kansas, and fifteen grandchildren, sixteen great grandchildren and four great, great grandchildren. She was possessed of a robust, vigorous constitution and retained full possession of her powers until a short time before her death.

She was a devoted member of the Christian church for upwards of forty-eight years. At her funeral six of her grandchildren acted as pallbearers. She was one of the oldest citizens in this section of southeastern Ohio.

Bucklen's Arnica Salve.

The best salve in the world for Cuts, Bruises, Sore, Ulcers, Salt Rheum, Fever Sore, Tetter, Chapped Hands, Chilblains, Corns and all Skin Eruptions, and positively cures Piles, or no pay required. It is guaranteed to give perfect satisfaction or money refunded. Price 25 cents per box. For sale by Logan Drug Co.

ECHOES FAR AND NEAR.

Down one Street and up Another. From Every Ward in Wheeling.

Hard to hold down the enthusiasm of our people under such circumstances as those surrounding the work of the little conqueror. There is no place in the world where a good thing is better appreciated than right here at home. We are quick to see it, and quick to "push it along" in the manner that it merits. From all parts of the city come the same reports; success following in every foot step, and investigation of each new case but adds to the endorsement that has gone before, and places their claims beyond the shadow of a doubt. This report comes from South Huron street, No. 28, where our representative found Mr. DeLoach, a real what she says.

"I suffered for several years with my back, brought on by an attack of La Grippe, characterized by severe aching pains across the small of my back and through my right thigh; bearing down pains in the bladder; numbness and aching of the ankles; often worse when lying down; and often, when in bed, I would be so stiff I could hardly turn over or get out of it. I felt tired and depressed all the time, especially in the mornings, and could not sit still for any length of time without wanting to go to sleep. I saw so many favorable accounts of Doan's Kidney Pills that I concluded that they would help me. I got a box at the Logan Drug Co., and began their use. I felt relieved after the first few doses, and was encouraged to continue their use, which I did, with splendid results. My sister was visiting me at the time, and being troubled as I was, she took some on my recommendation, and they helped her right away. I have recommended them to many of my friends, and it ever troubled in that way again would use nothing else."

Doan's Kidney Pills for sale by all dealers. Price, 50 cents. Mailed by Foster-Milburn & Co., Buffalo, N. Y., sole agents for the United States. Remember the name—Doan's—and take no substitute.

Plymouth Church's New Pastor.

CHICAGO, Jan. 3.—Rev. Dr. Newell Dwight Hillis, pastor of the Central church in this city, is to be called to the pastorate of the famous Plymouth church of Brooklyn, as the successor of Dr. Lyman Abbott.

The formal call will be extended to Dr. Hillis after a meeting of the advisory committee of the church. This was made a certainty on the return to Brooklyn from Chicago of members of the committee, which has been in conference with Dr. Hillis.

As soon as Dr. Hillis' acceptance of the call reaches Brooklyn it will be ratified and when the present pastor steps down Dr. Hillis will leave the field in which he has won high fame and take up his new place in the sanctuary hallowed by memories of two of the greatest clergymen of the century—Henry Ward Beecher and Lyman Abbott. Dr. Hillis is a native of Iowa and is forty years old. He was educated at Grinnell academy at Lake Forest University and at McCormick seminary. For three years after leaving his theological studies he was pastor of the First Presbyterian church of Peoria. From 1890 to 1894 he preached from the pulpit of the First church in Evanston. In December, 1894, he succeeded Professor Swing at Central church. Dr. Hillis, like his predecessors of Plymouth and Central churches, is a writer. The four books he has published are "Foretokens of Immortality," "How the Inner Light Failed," "A Man's Value to Society," and "The Investment of Influence."

After Another Trust.

COLUMBUS, O., Jan. 3.—Attorney General Monnett to-day filed in the Ohio supreme court a petition to oust the National Biscuit company from doing business as a trust in this state. The petition has been in readiness for several days awaiting a favorable opportunity for filing. The suit is in line with the attorney general's policy of fighting trusts in Ohio.

The petition filed relates that complaint that has been made to him by wholesale grocers regarding the methods of the trust, which he holds is contrary to the anti-trust law passed by the state legislature. It is claimed that other manufacturers are kept out so that the grocers are forced to pay the exorbitant prices asked. As an illustration it is stated that the price charged for crackers is equal to that of a bushel of wheat.

The attorney general claims that the Biscuit company is capitalized for \$55,000,000, but only has \$5,000,000 in the business.

Bloodless Duel.

BUDA PEST, Jan. 3.—The duel between M. Horanszky, a member of the lower house of the Hungarian diet, and Baron Banffy, the premier, took place this morning. Pistols were the weapons used. The duel was bloodless.

M. Horanszky in a recent debate in the lower house of the Hungarian diet, characterized Baron Banffy as a cheat and a traitor. Thereupon the premier challenged him, but the duel did not come off at the time expected, owing to the inability of their seconds to agree upon conditions. The seconds thereupon quarrelled and a series of duels between them followed.

Operations of Chinese Rebels.

LONDON, Jan. 3.—According to a dispatch from Hankau to the Morning Post, there are alarming reports from the upper Yang Tze Kiang region. The disturbances are increasing in the provinces of Szechuan, Hunan and Hupe. The dowager empress, it is further asserted, is curtailing the authority of the viceroys, especially in the Yang Tze and Hankau districts. A body of Chinese troops is being sent to attack the rebels, but they are said to have been reinforced by the enemy. The viceroys have been reinforced by three gunboats and three thousand men.

Railroad and Insurance Tax.

TOPEKA, KAN., Jan. 3.—The railroad bill and the bill taxing insurance companies on their gross premiums as passed by the extra session of the legislature were signed by Governor Leedy to-day. The insurance bill places a tax of 2 per cent on the gross premiums on the Kansas business of all outside insurance companies, whether fire, life or accident, and 4 per cent on European and other foreign companies.

FLORIDA. HAVANA. NASSAU.

Double Daily Trains from Cincinnati, Louisville, St. Louis and Kansas City via the Southern Railroad.

The Southern railway and connections have arranged for the accommodation of travel to the south this winter, the best service ever offered. Beginning December 4th, additional through Sleeping Car service will be established from Cincinnati, Louisville, St. Louis and Kansas City to Jacksonville, with through connections, without layover, for each of these points for trains leaving each morning and evening.

Time: Cincinnati and Louisville to Jacksonville, 25 hours; Havana 55 hours.

All ticket agents sell one-way and round-trip tickets to southern resorts via Southern Railway.

Ask your nearest ticket agent for rates and other information, or write C. A. BATH, Trav. Pass. Agent, Louisville, Ky.; J. C. BAKER, Jr., N. W. Pass. Agent, 80 Adams St., Chicago, Ill.; A. M. H. TAYLOR, Assistant General Passenger Agent, Louisville, Ky.

SAMPSON'S FUTURE.

Will not go on Leave of Absence. Work for him to do.

NEW YORK, Jan. 3.—Admiral Sampson entertained his daughter, whose marriage takes place to-morrow, and her friends, aboard the cruiser New York at luncheon to-day. The admiral has recovered from his recent indisposition. "I went down to Washington," said the admiral, "and caught cold. The doctors told me it was grip, so I went to bed. I feel now in first rate condition, though I still have a little cold. The reports that my condition was serious were exaggerated and my daughter's wedding will not be postponed on account of my own health or any sickness in the family."

Admiral Sampson will not go on leave of absence as has been generally supposed. The navy department is anxious for him to assume direct and active command over the North Atlantic squadron and he will indefinitely postpone taking the rest which his friends think he needs so much. In the course of a few weeks Admiral Sampson is likely to be at sea again on the New York, possibly in Cuban waters, although the programme for his squadron is not yet decided upon. The annual squadron exercise in evolutions and target practice will be held, if feasible, but so many ships are now in dock yards or awaiting repairs and overhauling that the squadron, after losing its European contingent, will be a small one.

Among naval officers generally it is believed that Sampson's retention on sea service indicates the department believes there is still much hard work to be done by the navy in the West Indies. Sampson's intimate knowledge of all questions affecting Cuba and his tact in dealing with the inhabitants of that island have made his services almost indispensable.

Four Brothers Marry Four Sisters.

CANAL DOVER, O., Jan. 3.—A most remarkable wedding has just taken place at the small village called Trail, ten miles north of here, four brothers being married to four sisters. The four knots were tied at the home of the four sister brides, who are the daughters of a prosperous farmer named James Hochstetler. Their ages range from eighteen to twenty-eight, and the ages of their respective husbands vary only slightly. The grooms are the four sons of John Sumers, and are energetic young men of good habits and some means. The ceremony of marrying the four couples occupied almost an hour, the same clergyman performing all. The four brothers and their wives will live within a stone's throw of each other.

Fate of an Annexationist.

TORONTO, ONT., Jan. 3.—In the Toronto mayoralty contest E. A. McDonald has been beaten by Mayor John Shaw by 398 votes. One of the arguments used against McDonald was that he had once advocated the annexation of Canada to the United States.

Mrs. Van Rensselaer's Book.

Mrs. John King Van Rensselaer has written a society book, as you may know, which gives the thirty-eight families that were influential in the days

when Washington was the leader in New York society. The title page of the book shows a family tree, and the inside of the book traces the branches of the tree. It is especially valuable to New York society leaders of the present day, to show whether they are of the original thirty-eight or not.

Women as Criminals.

Views of a Celebrated San Francisco Detective: Women as criminals are very smart, but they cannot keep crime hidden so well as a man.

A woman is more desperate in love affairs than in anything else. Men get desperate about money matters.

If a woman of the criminal type loves a man she will, as a rule, do almost anything to win him.

It is difficult to convict women of murder; the jurors are men, and they sympathize.

Men don't want to have women hanged, but a jury of women might go to the other extreme.

Women don't like women as well as men like men.

A woman has no sympathy for another woman who has done wrong, but often a man has sympathy for a wrong-doing fellow, and will help him out.

If a man doesn't like a man he wants to have the other know it. It is just the reverse between two women.

A half-way decent woman will do anything to hide a criminal who is her lover.

Get a woman in a tight place, and she will tell about a crime quicker than a man would.

When a woman is led to believe that a man has given her up she is apt to tell about his crimes.

Men kill themselves when they are broke; women don't. The women can stand it better, and are more used to it.

Most of the suicides of women are on account of desertion.

When a man is deserted he gets another girl, and begins life over.

May Bring Leprosy to this Country.

It is pointed out that the United States soldiers in Hawaii may contract leprosy there, and bring it to this country when they return. While leprosy is much to be dreaded, there are a thousand times as many victims to stomach disorders and blood diseases, but there is a cure for them in Hostetter's Stomach Bitters. Other common ailments that the Bitters are a specific for are malaria, fever and ague. Sold at all drug stores.
